HYDRAULIC ADJUSTABLE  
SECTIONS

#### SWIVELLING SUPPORT system MA/AG

On the series EDV we use swivelling supports with 2 conical roller bearings (to absorb, in addition to the vertical load also the horizontal actions) with inferior interchangeable protection carter.

The ma/ag's supports are the fruit of a targeted and specific internal design, validated from over 35 years of experience and continuous improvements for granting an extremely reliable product in all conditions of use.
